

# GO WITH THE FLOW FOR SAVINGS

## WITH THE NEW HOTSTART® CTM

Reduce energy costs with the new CTM engine heater. By swapping out your existing gen-set heater with a HOTSTART® CTM, you'll save up to 64% in energy costs! The CTM's built-in pump circulates coolant through complex water jackets and plumbing restrictions. Heating cycles are reduced extending heater element life and reducing energy use. Whether specifying heaters on new engines or upgrading existing installations, go with the CTM and GO WITH THE FLOW.
