

## PRODUCT DISCONTINUATION NOTICE

EFFECTIVE DATE  
December 1, 2016

### DV DUAL FLUID HEATING SYSTEM FOR RAILROAD AND LARGE ENGINE

## OVERVIEW

### AFFECTED EQUIPMENT

All dual-fluid forced circulation DV models.

### NOTICE SCOPE

Notification of model discontinuation.

### BACKGROUND

As of December 1, 2016, the DV model coolant heating system will no longer be offered. HOTSTART is completing the discontinuation process of the DV model, replacing this heating system with the updated DLV heating system.

In 2013, the DV model's programmable logic controller (PLC) component was discontinued by the manufacturer. While availability is limited, HOTSTART has developed an alternative non-PLC full control box replacement assembly. However, the non-PLC control box dimensions are larger and may not be suitable for all applications. Other related parts, such as the DV installation and maintenance kit (**DV-IK**), will be discontinued and superseded by the equivalent DLV installation kit: **DLV-IK**.

## RECOMMENDATIONS

For customers seeking a dual-fluid heating system for railroad or other similar large-engine applications, HOTSTART recommends the DLV model heating system. The DLV model features many of the standard and optional features as the preceding DV model. Additionally, the DLV model incorporates a larger control box with a removable lid for easier accessibility of control components.

## QUESTIONS & ASSISTANCE

If you have questions regarding the DV heating system discontinuation, related parts, or HOTSTART's next generation DLV model, please contact HOTSTART Customer Service at **509.536.8660** or [sales@hotstart.com](mailto:sales@hotstart.com).
