

# PRODUCT BULLETIN

EFFECTIVE DATE  
May 2025

## HEATING TANK SLEEVE COMPONENT FOR CSM FORCED CIRCULATION HEATING SYSTEMS

### OVERVIEW

#### AFFECTED EQUIPMENT

All aftermarket CSM heating system models incorporating the tank sleeve component.

#### BULLETIN SCOPE

Notification of product offering change.

#### SUMMARY OF PART CHANGES

- All aftermarket CSM models will be constructed without the tank sleeve component installed.
- Removal of the sleeve component does not affect CSM fit, function, or heating performance.
- All CSM models remain supported with the Hotstart warranty and retain any applicable third party certifications/approvals.

#### BACKGROUND

As of May 2025, Hotstart will begin manufacturing all aftermarket CSM models without the tank sleeve component.

Hotstart has determined that removal of the sleeve component does not impact system performance in a significant manner. Any impact to heating system efficiency has been determined to be negligible when compared to a sleeved tank counterpart.

All CSM models regardless of whether they are constructed before or after the effective date will retain the standard Hotstart one-year warranty. All third party certifications or approvals that apply to the affected CSM model will remain unchanged.

### QUESTIONS & ASSISTANCE

If you have questions about this product change or would like further information about the CSM heating system model options, please contact Hotstart Customer Service at **509.536.8660** or [sales@hotstart.com](mailto:sales@hotstart.com).
